

Hollard Prestige Portfolio v2: Mapping existing tracking device descriptions to new available options

In the previous version of the Prestige product, the tracking unit installed by your client was available for selection in the drop-down list provided. The enhanced version of the product has been simplified and only the following selectable options are available:

- None
- With early-warning
- Radio frequency
- Not early-warning or radio frequency

Please see the guideline below, which will assist you in mapping the current tracking device name to the correct selectable option based on the system enhancements.

Existing Description	New Mapping Description
